

23 days through the diversity of Brazilian landscapes

You need a lot of time even visiting only the main types of Brazilian landscapes:

- the *Rain Forrest* of the Amazonas, e.g. near **Manaus**,
- the *Dry Land “Sertão”*, e.g. the „Chapada Diamantina“ near **Salvador da Bahia**,
- the *Dunes* in the North, e.g. near **São Luis**,

Photos: Chapada Diamantina (Ian, Sarah), Lençóis Maranhenses (Andre Bispo), Foz do Iguaçu, Pantanal, Solimões und Rio Negro

- the *Pantanal* with its wide plains, e.g. near **Miranda**,
- the Highlands in the South-West, e.g. at **Foz do Iguaçu**.

We will visit such examples in order to give you a first impression of the richness of the Brazilian nature.
